

How is information communicated?

The project website is regularly maintained and updated and publicises ongoing work and progress.

The project will produce a number of academic and policy-relevant working papers and articles in international journals.

How can I find out more?

Please consult the project website:

<https://www.lives-nccr.ch/en/DAISIE>

Or contact either of the project leader or the coordinator at UNIL using the details provided overleaf.

Dynamics of Accumulated Inequalities for Seniors In Employment

DAISIE

The **Dynamics of Accumulated Inequalities for Seniors in Employment (DAISIE)** project explores the gendered impacts of policies and practices aimed at extending working life (EWL) in five contrasting national settings (the Czech Republic, Ireland, Sweden, Switzerland and the UK), using a mixed methods research design inspired by insights from life-course and gender studies. The project addresses two significant and timely issues: labour market participation in later life and retirement and the analysis of labour market and family trajectories.

What are the project's objectives?

The DAISIE project proposes to:

- *Trace intra-national continuities and change in gendered employment and family-formation patterns, using panel data and sequence analysis techniques*
- *Assess changes to the working conditions of the 50+ group, across countries and qualification levels*
- *Analyse EWL issues from a gender-sensitive perspective, determining potential tensions between 'active aging' and gender equality goals, at the European, national and organisational level*
- *Explore the wellbeing and health issues faced by male and female 50+ workers in three contrasting occupations (health, transport, financial services), using innovative case-studies to illustrate the combined effect of employment histories, family events and the provision of intergenerational care on the dynamics of inequality in later life*

Who is involved?

Switzerland

University of Lausanne

- Prof. Nicky Le Feuvre - *Project Leader*
- Dr. Nathalie Rougier

With

- Dr. Soline Blanchard
- Dr. Jacques-Antoine Gauthier
- Dr. Thierry Rossier
- Prof. Boris Wernli (FORS)

Czech Republic

Czech Academy of Sciences in Prague

- Dr. Alena Křížková
- Prof. Radka Dudová
- Dr. Marie Pospíšilová
- Dr. Marie Heřmanová

Mendel University in Brno

- Prof. Martina Rašticová

Ireland

National University of Ireland Galway

- Dr. Áine Ní Léime
- Dr. Nata Duvvury

Sweden

Karlstad University

- Prof. Clary Krekula
- Dr. Camilla Kylin

United Kingdom

University of Edinburgh

- Prof. Wendy Loretto
- Dr. Laura Airey
- Dr. Jakov Jandrić

University of Kent

- Prof. Sarah Vickerstaff

How long will the project last?

The project runs for three years from January 2018

DAISIE's main findings will be communicated in both academic and policy-related arenas and will be disseminated to a wide range of stakeholders and policy makers, via gender-sensitive policy toolkits

DAISIE is a research project funded by the transnational research programme “**Dynamics of Inequality Across the Life-course: structures and processes**” (DIAL) in the framework of **NORFACE** (New Opportunities for Research Funding Agency Cooperation in Europe), a partnership of nineteen national research funding agencies across Europe dedicated to leading and developing opportunities for scientists in the area of social and behavioural sciences.

The project is associated to the **Swiss National Centre of Competence in Research LIVES – Overcoming vulnerability: Life course perspectives (NCCR LIVES)**, which is financed by the Swiss National Science Foundation (grant number: 51NF40-160590)
